

AAF: Dear American Media, Please Stop Falling for Hamas Propaganda

Throughout Hamas' war on Israel, the American media has regularly fallen for terrorist propaganda. Much of this could have been avoided had American media waited for the facts before accepting Hamas' propaganda at face value.

Here are a few examples:

HOSPITAL EXPLOSION:

- On October 17, 2023, the Palestinian Islamic Jihad terrorist group attempted to launch a missile at Israel.
- The missile misfired and exploded in the Al-Ahli Arab Hospital's parking lot.
- Hamas immediately lied to the world, stating that Israel fired the missile and that 500 people died.

Unfortunately, the American media and the “Squad” failed to do their research and immediately began parroting Hamas' talking points that Israel launched a missile at a hospital.

AID STAMPEDE:

- On February 29, 2023, approximately 100 refugees were killed in a [stampede](#) attempting to receive humanitarian aid.

Again, the American media – including [CBS](#) and [CNN](#) – regurgitated Hamas' propaganda that Israeli troops opened fire on the refugees rather than wait for the truth to come out.

UNRWA:

- There's no shortage of [evidence](#) that UNRWA was a compromised quasi-Hamas organization even before the October 7th attack.
- However, even after October 7th and the release of ample [evidence](#) showing Hamas terrorists on the UNRWA payroll, the American media [continues](#) to support UNRWA. Just this week, CNN ran an article claiming that the links were [fabricated](#).

Bottomline: The American media must follow the facts wherever it may take them. Even if it means fact-checking Hamas.
